

oneDPA – making Data Protection Agreements simpler.

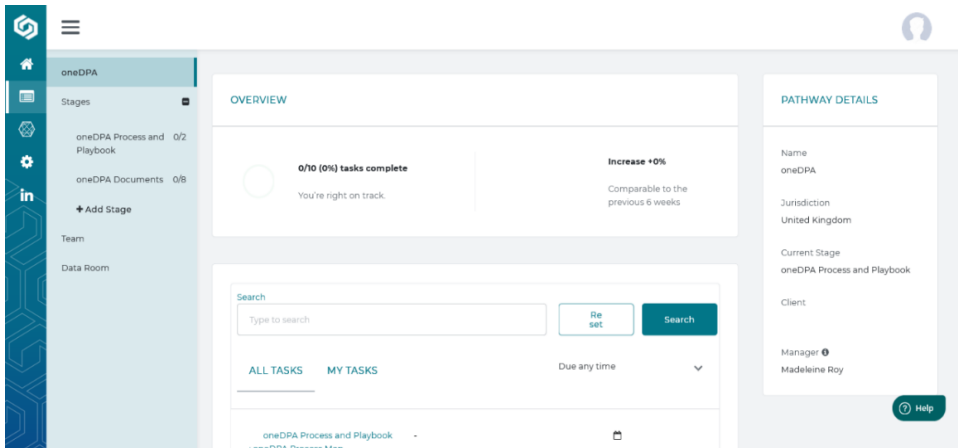

Widely known for their oneNDA product, [TLB Law](#), the leading legal design, operations and transformation legal design authority, have also produced oneDPA, for data protection agreements, in conjunction with Claustack and PWC. We've incorporated their playbook and process flow map, as well as all of their documents, into a Phundex Pathway to streamline the way you deal with data protection agreements. You can use these to create your own DPA's via the Phundex Platform, by following the playbook and process map to ensure you select the correct provisions of the SPA, the modules and the IDT Agreement.

You can also use this link to go through the automated process, and then upload the final version into the relevant Phundex Platform.

Phundex oneDPA Pathway

We've included all oneDPA's materials to make it easier for you to access and complete your own data protection agreements. In the first Stage, we include the oneDPA process map to allow you to work through which document(s) you'll require to meet your circumstances, as well as the oneDPA playbook that walks you through the process. In the second Stage, we include all of the documents referenced in the process map and pathway, to allow you to complete the documents as required. As a final option, you can also use the link to Contractpodai's site to [Complete your DPA](#).
